Work Experience

Senior Software Engineer   Jun 2018 - Present
Tez Minds Software Pvt. Ltd, Pune

- Architected and implemented scalable software architectures, prioritizing performance and security, resulting in improved system stability and user satisfaction.
- Developed dynamic front-end applications using React.js, enhancing user experiences and driving increased engagement.
- Engineered robust RESTful APIs and backend services using PHP, and Go Lang, seamlessly integrating with cloud platforms such as AWS, Azure, and GCP.
- Implemented stringent security measures, ensuring data integrity and privacy, and complying with industry standards and regulations.
- Collaborated cross-functionally with stakeholders to define project requirements and deliver high-quality solutions, fostering effective communication and teamwork.
- Provided technical leadership and mentorship to team members, promoting their professional growth and ensuring the overall effectiveness of the team.

System Engineer   Jan 2017 - Jun 2018
Infosys Ltd

- Leveraged expertise in Python and associated technologies, including Sikuli, Selenium, NodeJS, PHP, MySQL, JAVA, and SVN, to develop and maintain robust business process automation scripts.
- Streamlined workflows and improved organizational efficiency by implementing effective automation solutions, resulting in a 40% reduction in manual effort and increased productivity.
- Collaborated with cross-functional teams to identify automation opportunities and develop innovative solutions that aligned with business objectives.
- Conducted thorough testing and debugging of automation scripts, ensuring their reliability and accuracy in various scenarios.
- Maintained clear and concise documentation of automation processes, facilitating knowledge transfer and ensuring seamless integration with existing systems.
- Actively contributed to continuous improvement initiatives, suggesting enhancements to existing automation processes and tools.
- Consistently adhered to best practices and industry standards in software development, ensuring the scalability and maintainability of automation scripts.
- Demonstrated strong problem-solving skills and attention to detail in identifying and resolving issues in automation scripts

Project

QrCodeChimp
Jun 2019 - Present

Tez Minds Software Pvt. Ltd, Pune

- Developed and implemented the user interface for QrCodeChimp, a customizable QR code creation application, resulting in improved user experience and increased customer satisfaction.
- Integrated payment gateways, including Razorpay and Stripe, into the application, enabling seamless and secure transactions for users.
- Utilized APIs to enhance the application's capabilities and provide additional features for users.
- Maintained clear and consistent communication with stakeholders, ensuring a thorough understanding of project requirements and delivering solutions that met their needs.

NeuroTags & NeuroMarketing
Jun 2019 - Present

Tez Minds Software Pvt. Ltd, Pune

- Led the design and implementation of marketing solutions tailored for enterprise products, ensuring alignment with business objectives and market demands.
- Developed comprehensive marketing strategies and executed campaigns to effectively promote enterprise products to target audiences.

FarWide Outdoors
Jun 2019 - Present

Tez Minds Software Pvt. Ltd, Pune

- Spearheaded a project aimed at providing users with seamless access to outdoor activities through an intuitive platform integrated with interactive maps and booking functionalities.
- Led a multidisciplinary team in the design and development of a user-friendly interface, enabling users to easily browse, discover, and book outdoor activities.
- Orchestrated the integration of Stripe payment gateway, ensuring secure and efficient payment processing for users.

ChatBot
Oct 2017 - Jan 2018

Infosys Ltd

- Designed and developed a Chat Bot using Python TensorFlow library, simulating human conversation to streamline daily support operations.
- Integrated the Chat Bot with Google Voice Assistant and Slack channel, providing a user-friendly interface for end users.
- Collaborated with cross-functional teams to gather requirements and ensure the Chat Bot met the needs of the organization.

Business Process Automation
Oct 2017 - Jan 2018

Infosys Ltd

- Developed multiple scripts using Python and Java to automate tasks within functional processes, resulting in significant time and cost savings for the organization.
- Implemented full stack development for interactive web applications, leveraging PHP, HTML, CSS, and Node.js, to enhance functionality and improve user experience.
